SUMMARY

Fourth-year CS student and software developer building with Python, JavaScript, React, SQL and PostgreSQL, targeting Frontend, Backend and Full Stack roles. Founder of Padharaksha, a B2B wholesale business that generated ₹1.78L in sales and ₹47K profit in its first 7 weeks.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Web: HTML5, CSS, Responsive Web Design
Frameworks / Libraries: React, FastAPI
Databases: PostgreSQL
Tools: Git, GitHub, Docker, Figma

PROJECTS

WindDesk — Wind Forecast Accuracy App (Gridbricks Hiring Challenge)

- Built for a UK energy utility's day-ahead purchasing desk: shows the earliest wind generation forecast received for every hour of January 2026 against the wind that actually arrived.
- Quantified forecast accuracy over 744 forecast hours — first-forecast MAE of 2,051 MW vs 1,035 MW for the final update — with day-level and hour-level breakdowns.
- React, FastAPI (Python), Docker; deployed on Vercel. Live: krelvanto.vercel.app | Code: github.com/norvantek/krelvanto

Padharaksha Wholesale Ordering Platform

Building a scalable wholesale ordering platform, evolving the WhatsApp-based B2B MVP that generated ₹1.78L in sales in 7 weeks. Status: In development.

CodPox

Portfolio-as-a-service for CSE students preparing for placements — a structured way to present projects and skills as proof of work. Status: In development.

EXPERIENCE

Founder & Operations Lead, Padharaksha (B2B Wholesale Footwear) **Aug 2025 – Jul 2026**

- Pivoted from a planned e-commerce website to a WhatsApp-based B2B wholesale MVP after finding usability gaps among target retailers.
- Generated ₹1.78L in sales and ₹47K profit in the first 7 weeks; secured 9 bulk orders in the first 3 days.
- Signed 12 footwear manufacturing partners in Delhi through direct negotiation; earned early revenue via a ₹999 supplier onboarding model.
- Recruited a 20-member team, restructured to a 5-member core team.
- Converted MVP learnings and retailer workflows into product requirements for a scalable wholesale ordering platform, now in development.

Founder & Program Lead, SintraX Creations (SXC), Eluru **Aug 2026 – Present**

- Founded a project-building initiative where engineering students learn by building real software projects end to end.
- Work directly with students through the full build cycle (planning, development, testing, deployment and showcase), tracking progress at each stage.
- Built systems for student contribution tracking, project proof and certification.
- Apply AI tools in research, development, debugging and product improvement across student projects.

Founder & Developer, CodPox **Oct 2026 – Present**

- CodPox is a portfolio-as-a-service for CSE students preparing for placements — a structured way to present projects and skills as proof of work.
- As founder and developer, own the product end to end: concept, design and development. Currently in development.
- Building it as a network where students can showcase their work and reach opportunities beyond their own campus.

EDUCATION

B.Tech, Computer Science, Sir CR Reddy College of Engineering **2023 – 2027**
CGPA 7.3
